

Energy Logserver Unveils AI ON-PREM Version 7.9, Showcasing Secure On-Premise AI at Singapore FinTech Festival 2025

WARSAW, Poland - November 12, 2025 - *Energy Logserver* proudly announces the launch of Version 7.9, introducing AI ON-PREM, a fully on-prem AI solution that redefines secure enterprise operations.

AI ON-PREM enables organizations to enhance log analysis, event correlation, and incident response, all while ensuring full data control and compliance with the most demanding regulatory standards. The new module will make its international debut at the Singapore FinTech Festival 2025, one of the world's leading events for financial innovation and cybersecurity.

As enterprises increasingly demand secure AI systems without cloud dependencies, AI ON-PREM provides a strategic advantage. Built directly into the Energy Logserver platform, it empowers organizations to detect anomalies, automate SOC workflows, and generate actionable insights, all within their own infrastructure.

As part of its growth in the Asia-Pacific region, Energy Logserver collaborates with ACA Pacific, its official distributor, to bring secure, on-prem AI solutions to new enterprise markets. Both organizations will engage with industry leaders at the Singapore FinTech Festival 2025 to showcase how AI ON-PREM transforms operations across regulated sectors.

Key Highlights of Energy Logserver v7.9:

- **AI-Powered Log Analysis & Event Correlation:** Detects anomalies, interprets complex data, and recommends corrective actions in real time.
- **On-Premise LLM for Full Control:** Operates entirely within the customer environment, ensuring data security, compliance, and independence from external services.
- **Optimized for SOC Teams:** Automates repetitive tasks, accelerates response times, and improves overall operational efficiency.
- **Integration with Energy AI:** Expands machine learning capabilities across dashboards, reports, and predictive analytics.
- **Multilingual AI Support:** AI ON-PREM communicates in multiple languages, enabling global teams to access insights seamlessly.

- **Compliance-Ready Architecture:** Built to meet strict data protection and regulatory requirements, including finance, energy, and government sectors.

“Version 7.9 marks a major leap forward in secure, enterprise-grade AI,” said Artur Bicki, CEO of Energy Logserver. “With AI ON-PREM, we’re giving organizations the power to innovate with full autonomy, bringing advanced language models, automation, and intelligence directly into their infrastructure. At Energy Logserver, we believe the future of AI lies in secure independence. This release embodies that vision, empowering enterprises to accelerate insights, ensure compliance, and build trust in a world where data ownership defines success.”

About Energy Logserver

Energy Logserver is a leading provider of enterprise log management, data analytics, and cybersecurity solutions based in Warsaw, Poland, with a growing presence in international markets. Its platform empowers organizations to monitor, analyze, and secure IT environments with precision and scalability, integrating advanced analytics, automation, and AI-driven insights across products such as Energy Monitor, Energy SOAR, and Energy Logserver. Guided by CEO Artur Bicki, the company values innovation and community impact, proudly supporting the Warsaw Youth Cycling Club (WKK), which helps over 300 children pursue their passion for competitive cycling.
