Singapore Management University

## About SFF

Organised by the Monetary Authority of Singapore, the Singapore FinTech Festival (SFF) is on its 6th edition. Last year's annual event brought together 60,000 participants – both virtually and in-person – for the development of financial services, public policy and technology. SFF 2021 will take place with a hybrid format, bringing together a digital platform with an event in Singapore as well as a distributed network of World FinTech Festival events in key FinTech hubs.
